Skill set

Java JavaFX PostgreSQL Git OOP Spring Framework

Projects

Medical Records Management System

Technologies: Java, PostgreSQL, Java FX
- Developed and integrated 5 core functionalities into the program, including adding, deleting, modifying medical records, user signup processes and login capabilities to enhance system usability.
- Designed a user interface using JavaFX, implementing 3 core components: responsive layout, interactive elements, and real-time data display for enhanced user experience.
- Integrated the program with a PostgreSQL database, implementing 4 core operations: data retrieval, insertion, update, and deletion, ensuring seamless data management and scalability.

Lofi Pomodoro

Technologies: JavaScript, HTML 5, CSS
- Created a 3-mode timer (Pomodoro, Short Break, Long Break) with customizable time adjustments.
- Implemented automatic audio notifications and visual indicators (e.g., favicon state) upon timer completion.
- Developed JavaScript-based interactive UI for real-time task and timer control.
- Integrated a volume control, playlist switching (e.g., lofi, sci-fi), and lazy loading for efficient media handling.
